

East® steel dump trailers

- *Maximum uptime and reliability.*
- *More capacity and lower center of gravity.*
- *Greater payback at resale.*
- *Baked-on painted finish adds the look of style and integrity.*

An East steel dump earns you more – and costs you less – in the long run.

You have a profit center in your East steel dump trailer. That's because we build an East trailer to give you more payload per trip – yet maintain strength so you don't eat up your earnings with downtime and repair. You also get the added value of our one-year limited warranty...support from our nationwide network of trained dealers...and the higher resale value that East quality brings. The life cycle advantages alone make an East steel dump trailer one of the most cost-effective trailers you can buy.

Payload plus endurance

With an East steel dump trailer, you can legally haul more payload per trip. That's earning power you can bank on – without paying a penalty in strength. The body of your East trailer is made from AR400 grade steel, so your East trailer will resist twisting, flexing and cracking.

Durable by design

Longer floor life with longitudinal beams that reduce contortion

We build extra support into our floors, so you get extra service life. Twin longitudinal 4" x 4" box beams are full length to reduce body twist.

Tight fitting hinge for maximum dump stability

Our rear hinge mount is attached to the main frame web, then to an outer pocket gusset for maximum strength and resistance to cracking. The hinge shoes are mounted on a 2-3/4" diameter high Brinell hollow tube for longer wear life and tight tolerances.

Chassis are built to last

All East chassis are constructed from one-piece I-beams. This design results in fewer welds and joints than a fabricated beam, and more efficient use of material...putting the strength where it's needed. Chassis cross members gussets are bolted – not welded – to allow the assembly the flexibility to give under normal stresses and vibrations, yet still maintain a positive connection.

Tight gate seal and long life hardware

Bottom gate latch and top hinge hardware are bolt-on, cast steel for easy replacement.

Seamless hoist base assembly reduces cracking

The hoist mount is made of 1/4" thick, 3" x 5" seamless tubing for extra strength in this high stress area.

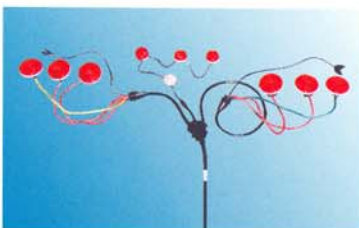

Choice of axle, suspension and wheel assemblies

East builds the assembly that best meets your specific needs – in your choice of tandem, tri-axle, multi-axle or lift axle.

Wired for protection

Sealed beam lamps and isolated ground wiring are used for all lights. A sealed wire harness is enclosed in a water resistant rear panel, reducing exposure to corrosion and failures in this vulnerable area.

We at East believe certain ideas are basic to good business.

Here's one: don't make promises we can't keep. Here's another: keep the promises we make.

What we promise you are products you can rely on, people you can depend on and payback value you can bank on.

Since we started in 1968, the East name has come to stand for quality. Our product innovation, reliability and resale value are second to none.

To help you get the most from East, we select and train the best dealers to provide you with the knowledge and support you need. And we provide a host of services – product selection, knowledgeable people, financial options and more – that help you with the other essential aspects of your business.

Now here's an idea **you** can believe in: East has what it takes to help you build your business.

***Building our business
by helping
you build yours***

East 1-Year Limited Warranty

An East trailer starts with materials that exceed most industry standards. Our goal is to build products that are superior in performance and value. When we put the East name on a trailer, we stand behind it. We always have...and we put that promise **in writing** so you can be assured of prompt action if you need it.

We want our customers to be as satisfied with our service as they are with our trailers. A nationwide network of East distributors is qualified and trained to live up to high standards for service, repair and parts availability.

Ride with pride...

East steel dump trailers are sandblasted, primed and coated with a baked-on paint finish – just another extra touch provided by East.

High quality baked-on paint gives your East steel dump trailer a durable, classy look. We also rounded the corners and smoothed the transition lines for a sleeker, trimmer appearance. Many other details – such as neat welds and precise component fit – testify to the meticulous care always built into an East.
