

East® Transfer Trailers

*The ideal balance
of strength, weight and
operating efficiency
for optimum return
on investment.*

The Full Line of East® Transfer Trailers

Everything for the success of your business.

There's no better way to build your business than choosing from the proven line of East® transfer trailers. They give you the industry's best opportunity to make the most of your investment, now and down the road.

Lightweight for optimum payload potential.

Count on East to strike the ideal balance of strength and weight for optimum payload. East trailers are designed to maximize payload and still give you the strength to handle the stresses of hauling refuse every day.

Low cost of operation.

An East design means a better design, proven to perform with top efficiency and minimum downtime for a better bottom line.

Strength and durability.

No other trailer manufacturer can match East's reputation for heavy-duty performance. Every East trailer is designed to be strong and dependable, able to tackle any job and hold up under the toughest conditions.

Higher resale value.

This last measure of earning potential is often overlooked. Not only can you count on East trailers to keep producing for decades, you can count on them to be worth more at resale. Being better built means they retain value, longer.

Take a look at the full line of East transfer trailers. Whatever your needs, you'll find more of what you're after. The right model, with the best features, for the best return on your investment.

GENESIS Smooth-Side Transfer Trailers

Fuel-saving aerodynamics taken to a new level.

With Genesis™, East has introduced the smooth-side design that offers the maximum combination of payload capacity, durability and operating savings. Its aerodynamics make Genesis transfer trailers easier running and easier on fuel, giving 5 to 10% better mileage.

- Extruded sidewall panels are 2" thick and supported by internal ribs every 3". The rib spacing gives 8 times the support of external posts positioned every 25".
- Tipping platform trailer width is increased 4" for up to 5.75 cu. yds. of extra payload.
- Unique double-wall construction* protects outer panels from dents and bulges, adding to resale value.
- Advanced system of floor-to-wall attachment adds strength. Cross-members and floor plates interlock into bottom rub rail, which forms a pocket to accept side walls.
- Extruded top rails are 1/2" thick on top and inside edges to better withstand loading abuse.
- Unique wall design allows addition of extra aluminum where needed for longer wear, and/or extra height for increased capacity.

*Patented

East Genesis™ available in Tipping Platform or Live-Floor versions.

Cross-section of Genesis side wall.

Greaseable tailgate hardware. Designed for long life, low maintenance.

Variable thickness and height to match your needs

Aerodynamic cross-members on Tipping Platform

Advanced floor-to-wall attachment system

Extruded sidewall panels increase support 8 times.

Each East trailer style offers unique advantages.

Advantages of All East Trailers

Value-added features offered on all Genesis™ and Unloader® models:

- Standard East "Elite" wheel-end parts are warranted for 5 years or 350,000 miles.
- Landing gear features extra-wide wings, diagonal support braces and C-channel cross-members to withstand frequent shocks.
- Side-swing, overslung, center-split, airflow and leak-resistant tailgate options.
- Plug-together wire harness eliminates all junction boxes.
- Fifth-wheel assembly is "overbuilt" for maximum load-bearing strength. A stainless steel band protects against galvanic corrosion.

Wheel-end parts warranted for 350,000 miles.

Tough landing gear.

Aerodynamic gate options.

Overbuilt fifth-wheel assembly.

Plug-together wire harness.

Added Live-Floor Advantages

Value-added features offered by both the Genesis™ and Unloader® Live-Floor models:

- Proven Hallco® and Keith® floors ensure fast, efficient unloading, with specifications matched to your needs.
- Subframe with integrated push block redesigned for greater durability.

Specify either Hallco® or Keith® live floors.

Subframe integrated with push block.

Added Tipping Platform Advantages

- In the Genesis, V-shaped cross-members placed close together increase aerodynamics while maintaining structural strength, and the subframe is integrated with cross-members.
- With no hydraulics to add weight, greater payloads are possible. No need for a specially equipped tractor.

Aerodynamic V-shaped cross-members.

East tipping platforms offer the greatest payload potential.

Unloader[®] Transfer Trailers

Setting the standards for long-running value.

East Unloader available in Tipping Platform or Live-Floor versions.

Cross-section of Unloader side wall.

Beefed-up top rail

Stronger floor construction.

Greaseable extruded hinge. Designed for longer life, low maintenance.

East Unloader sheet-and-post style trailers have long been the leaders in performance and durability, with decades of tough, dependable service...and higher value at resale time.

- Maximum strength side walls are thicker than competitive models, and posts are continuously welded for greater durability.
- Unique extruded 7" bottom rail allows maximum strength welding of side posts and side wall sheet directly onto the bottom rail before the dirt-shedding wedge plate is added.
- Heavy-duty 5-1/2" x 9" x 5/8" top rail has an integral rail reinforcement to help eliminate side bow and damage to side wall from overhead loading.
- Stronger 5-1/4" extruded I-beam floor cross-members offer 30% more bending resistance than the 4" cross-members others use.
- With over 30 years of experience building aluminum trailers that last, it's no wonder you'll find so many of our original 1980 transfer trailers are still on the job.

East 1-year limited warranty.

An East trailer starts with materials that exceed most industry standards. Our goal is to build to the highest level of craftsmanship. When we put the East name on a trailer, we stand behind it. We always have...and we put that promise **in writing** so you can be assured of prompt action if you need it.

We want our customers to be as satisfied with our service as they are with our trailers. A nationwide network of East distributors is qualified and trained to live up to high standards for service, repair and parts availability.

Unloader® Live-Floor/Compactor Compatible Trailer – Designed with reinforced bulkhead and side wall bracing to handle compactor loading forces.
